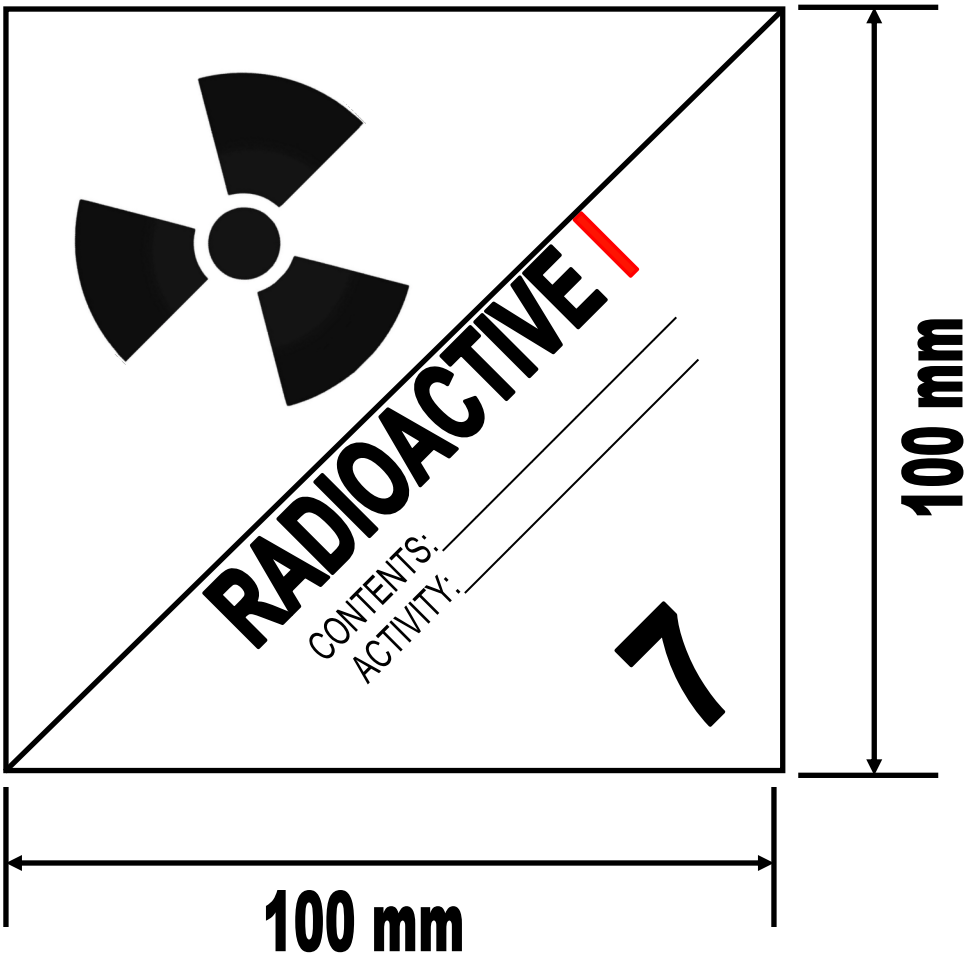
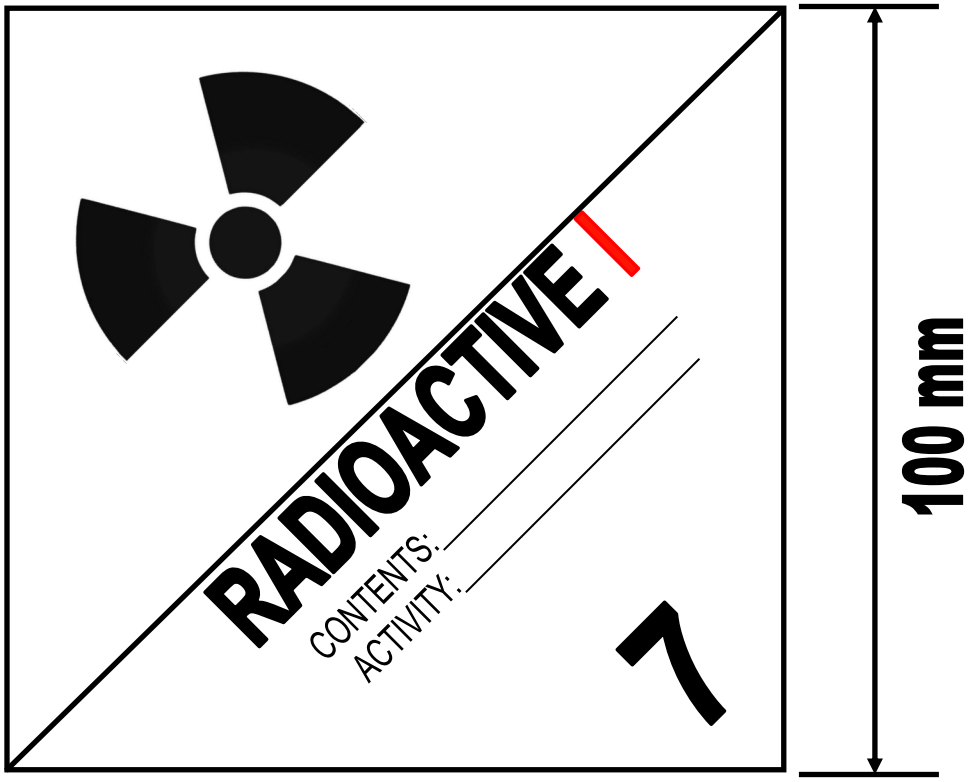
Print Form

Class7: Radioactive substances





Class 7. Radioactive substances are highly dangerous goods that can emit ionizing radiation. These dangerous goods are divided into three categories:

7.1	The maximum radiation level at the surface of the package does not exceed 5sv/hr.
7.2	The radiation level at the surface of the package is more than 5 sv/hr but the maximum does not exceed 2000 sv/hr.
7.3	The radiation level at the surface of the package is more than 500 sv/hr but the maximum does not exceed 2000 sv/hr.

This mark must be a square set at 45 Degree angle, that is diamond shape. The line forming this diamond shape must be 2 mm and the size must be 100 x 100 mm

Supplied courtesy of AIRSAFE Transport Training

Scheduled courses available: Adelaide, Brisbane, Darwin, Melbourne, Perth and Sydney Course dates: https://www.airsafe.com.au/course-events

Web: www.airsafe.com.au Email: admin@airsafe.com.au
