

## Class 3: Flammable Liquids

Class 3. This class includes the flammable liquids. Flammable liquids are dangerous goods as well, because are capable of being burned or ignited. That is to say the ignition of the flammable liquid is seen as the biggest hazard.

In general, the flammable liquids in accordance to their degree of danger are divided into three packing groups. Remember that higher vapor pressure can be exhibited by liquid compounds.

This mark must be a square set at 45 Degree angle, that is diamond shape. The line forming this diamond shape must be 2 mm and the size must be 100 x 100 mm
